

PRESS RELEASE – Klinge Corporation served as speaker at the World Trade Center Harrisburg’s International Trade Conference

May 25, York, PA

Mr. Allan Klinge, President of Klinge Corporation, was invited to speak during a breakout session at the World Trade Center of Harrisburg’s International Trade Conference.

The session, called ‘Making Trade Agreements Work for You!’, included an overview of the services provided by the Office of Trade Agreements Negotiations and Compliance (TANC) and the “local success story” of Klinge Corporation, a York, PA manufacturer of specialized refrigerated transport containers.

As part of the International Trade Administration’s Trade Agreements Compliance Program, TANC, ensures foreign compliance with international trade agreements. The program assists all U.S. exporters or investors facing trade barriers, including unfair testing, labeling, or certification requirements, government procurement issues, “border barriers”, and discriminatory investment requirements. Brian Woodward, Policy Director, Office of Trade Agreements Negotiations and Compliance (TANC) served as a co-speaker during this breakout session.

During Klinge Corporation’s portion of the breakout session, Allan Klinge discussed how the TANC program assisted them in overcoming technical barriers to trade. The company had won a multi-million dollar contract with the Australian Defence Force, but the equipment was held up in customs abroad. Klinge Corporation reported a trade barrier on the International Trade Administration’s website and was immediately contacted by TANC to come up with a strategy to release the equipment. TANC leveraged bi-lateral discussions to work to resolve the issues. In the end, the contract was fulfilled and the Australian Defence Force has placed additional orders since the initial contract.

About Klinge Corporation

Klinge Corporation is the leading provider of specialized transport refrigeration and power generation equipment. Founded as a spin-off of the Transport Refrigeration Equipment department of York International, Klinge has been producing refrigeration equipment at its manufacturing facilities and headquarters in York, Pennsylvania, USA since 1984.

The company's customized designs offer commercial and military customers robust alternatives to standard, mass-produced refrigerated containers which often cannot meet the requirements of harsh environments or stringent testing.

Klinge Corporation offers Dual Refrigerated Containers, Offshore Explosion-Proof Refrigerated Containers, Refrigerated Tank Containers, Blast Freezers, Ultra-Low Temperature Units, Quick Thaw Units, Integral and External Generator Sets, and Collapsible Food Storage Bins.

The company designs and manufactures the following:

- **Ultra-Low Temperature (-60°C) Freezer Containers** – for pharmaceuticals, ice cores, tuna, etc
- **Offshore Refrigerated Containers** – for Hazardous Zones such as oil rigs, oil tankers, and chemical plants
- **Explosion-Proof Refrigerated Containers** – for Petrochemical, Self-Reactive and Like Products
- **Dual Refrigeration System Refrigerated Containers** (with 100% emergency backup capabilities) – for chemicals, pharmaceuticals, and dangerous goods.
- **Tank Refrigeration & Heating Units** – for ISO Containers, Road Trailers and Stationary Applications
- **Military Refrigeration and Air Conditioning Applications** – built to military standards
- **Transport Air Conditioning Units** – built to withstand extreme high temperatures & sandstorms
- **Pre-Coolers** – used for fruit and vegetables in the field allowing for longer shelf life
