## **PRESS RELEASE – Klinge to exhibit at LogiPharma and showcase their Temperature Control Ocean Containers for cold chain supplies**

Klinge Corporation will be exhibiting at LogiPharma, Europe's leading Pharma Supply Chain event held in Montreux Switzerland. Each year, thousands of supply chain professionals from the top pharma, generics and animal health companies attend the event to hear high-quality presentations from top professionals in the industry, assess the latest trends, learn ways to address supply chain challenges, and discover new innovations.

Klinge Corporation will feature their Ultra-Low Temperature Freezer Ocean Containers that cool cold chain supplies down to  $-60^{\circ}\text{C}/-76^{\circ}\text{F}$ . These highly specialized containers provide the ultimate reliability to store and transport high-value pharmaceuticals. They are available as a Single or Dual Freezer Unit Container (optional generator set for back-up power) and Blast Freezer Unit Container (quickly cools cold chain supplies to  $-60^{\circ}\text{C}/-76^{\circ}\text{F}$ ).

In addition, Klinge Corporation offers Dual Refrigerated Containers to safely store and transport cold chain supplies at temperatures down to  $-25^{\circ}\text{C}/-13^{\circ}\text{F}$ . These Dual Refrigerated Containers have two full capacity reefer units to offer peace of mind when transporting cold chain supplies.

An added benefit to using Klinge Corporation's Freezer and Refrigerated Containers is that they allow for significant cost savings since they are transported via ocean in a containership versus expensive air freight.

LogiPharma will be held from 25 – 27 April 2017 at the Montreux Music and Convention Center.

### **About Klinge Corporation**

Klinge Corporation is the leading provider of specialized transport refrigeration and power generation equipment. Founded as a spin-off of the Transport Refrigeration Equipment department of York International, Klinge has been producing

# KLINGE CORPORATION

refrigeration equipment at its manufacturing facilities and headquarters in York, Pennsylvania, USA since 1984.

The company's customized designs offer commercial and military customers robust alternatives to standard, mass-produced refrigerated containers which often cannot meet the requirements of harsh environments or stringent testing.

Klinge Corporation offers Dual Refrigerated Containers, Offshore Explosion-Proof Refrigerated Containers, Refrigerated Tank Containers, Blast Freezers, Ultra-Low Temperature Units, Quick Thaw Units, Integral and External Generator Sets, and Collapsible Food Storage Bins.

The company designs and manufactures the following:

- **Ultra-Low Temperature (-60°C) Freezer Containers** – for pharmaceuticals, ice cores, tuna, etc
- **Offshore Refrigerated Containers** – for Hazardous Zones such as oil rigs, oil tankers, and chemical plants
- **Explosion-Proof Refrigerated Containers** – for Petrochemical, Self-Reactive and Like Products
- **Dual Refrigeration System Refrigerated Containers** (with 100% emergency backup capabilities) – for chemicals, pharmaceuticals, and dangerous goods.
- **Tank Refrigeration & Heating Units** – for ISO Containers, Road Trailers and Stationary Applications
- **Military Refrigeration and Air Conditioning Applications** – built to military standards
- **Transport Air Conditioning Units** – built to withstand extreme high temperatures & sandstorms
- **Pre-Coolers** – used for fruit and vegetables in the field allowing for longer shelf life
