## **PRESS RELEASE – Klinge Corp moves production of their Quick Thaw Container to the United States**

March 2016, York, Pennsylvania

Klinge Corporation is moving production of their Quick Thaw Container, Model QTU-42, to their York, Pennsylvania facility from Denmark. The move will streamline the production of the equipment and allow for higher capacity output. The initial production run was a great success and Klinge Corporation

The QTU-42 quickly and efficiently defrosts 10-12 pallets in a period of 12-36 hours. The patented defrost systems allows for accurate and effective defrost with minimal manual operation. Furthermore, the unit goes into storage mode automatically once the thawing process is complete.

The Quick Thaw Containers are primarily used to thaw seafood and meat. Companies see significantly reduced transport costs because seafood and meat can be frozen and transported by ocean versus air shipping fresh cargo.

Studies have also shown that shelf-life is increased when deeply frozen seafood and meat is thawed, at a time of the customer's choosing, in a controlled environment.

Klinge Corporation also manufacturers Blast Freezer Containers and Deep Storage Containers. These ultra-low temperature freezer containers store cargo at -60°C and are used primarily for quickly freezing of long-term storage of pharmaceuticals, seafood and meat.

### **About Klinge Corporation**

Klinge Corporation is the leading provider of specialized transport refrigeration and power generation equipment. Founded as a spin-off of the Transport Refrigeration Equipment department of York International, Klinge has been producing refrigeration equipment at its manufacturing facilities and headquarters in York, Pennsylvania, USA for 29 years.

# KLINGE CORPORATION

The company's customized designs offer commercial and military customers robust alternatives to standard, mass-produced refrigerated containers which often cannot meet the requirements of harsh environments or stringent testing.

Klinge Corporation offers Dual Refrigerated Containers, Offshore Explosion-Proof Refrigerated Containers, Refrigerated Tank Containers, Blast Freezers, Ultra-Low Temperature Units, Quick Thaw Units, Integral and External Generator Sets, and Collapsible Food Storage Bins.

The company designs and manufactures the following:

- **Ultra-Low Temperature (-60 °C) Freezer Containers** - for pharmaceuticals, ice cores, tuna, etc
- **Offshore Refrigerated Containers** - for Hazardous Zones such as oil rigs, oil tankers, and chemical plants
- **Explosion-Proof Refrigerated Containers** - for Petrochemical, Self-Reactive and Like Products
- **Dual Refrigeration System Refrigerated Containers** (with 100% emergency backup capabilities) - for chemicals, pharmaceuticals, and dangerous goods.
- **Tank Refrigeration & Heating Units** - for ISO Containers, Road Trailers and Stationary Applications
- **Military Refrigeration and Air Conditioning Applications** - built to military standards
- **Transport Air Conditioning Units** - built to withstand extreme high temperatures & sandstorms
- **Pre-Coolers** - used for fruit and vegetables in the field allowing for longer shelf life
- **Transport Generator Sets** - built to withstand extreme high temperatures & sandstorms
