PRESS RELEASE Klinge Corp delivers additional twenty-three Refrigerated Container Systems—after initial order of 185 units—to the Australian Defence Force

June 2016, York, Pennsylvania

Thirteen of Klinge Corporation's Military Refrigerated Container Systems are set to arrive at the Australian Defence Force (ADF) in Melbourne later this month. This is an add-on to the initial order of 185 Refrigerated Containers and represents a nearly 12.5% increase in the capacity of the Australian Defence for these container types.

Klinge Corporation will deliver ten of their 10' Military Refrigerated Containers and thirteen of their 20' Military Refrigerated Containers. The 10' Systems are capable of refrigerating or freezing food supplies. The 20' Systems contain a moveable bulkhead to provide separate refrigerated and freezer sections. The 10' and 20' Refrigerated Containers feature an integral, heavy duty diesel genset for independent power.

Furthermore, both 10' and 20' systems are qualified to numerous military standards (including vibration, cooling, performance, power, and driving rain) and were validated at a state-of-the-art government test facility in Melbourne. The ADF is the military organization responsible for the defense of Australia. Supported by the Department of Defence, it includes the Australian Navy, Air Force, and Army.

Vice President, Allan Klinge, says: "Klinge Corporation's Refrigerated Containerized Systems form a vital part of the food distribution chain for the Australian Defence Force and provide cold storage for field kitchens. We are excited to continue our support of the Australian Defence Force by providing our highly specialized and rugged Refrigerated Container Systems."

About Klinge Corporation

Klinge Corporation is the leading provider of specialized transport refrigeration and power generation equipment. Founded as a spin-off of the Transport Refrigeration Equipment department of York International, Klinge has been producing refrigeration equipment at its manufacturing facilities and headquarters in York, Pennsylvania, USA for 29 years.

KLINGE CORPORATION

The company's customized designs offer commercial and military customers robust alternatives to standard, mass-produced refrigerated containers which often cannot meet the requirements of harsh environments or stringent testing.

Klinge Corporation offers Dual Refrigerated Containers, Offshore Explosion-Proof Refrigerated Containers, Refrigerated Tank Containers, Blast Freezers, Ultra-Low Temperature Units, Quick Thaw Units, Integral and External Generator Sets, and Collapsible Food Storage Bins.

The company designs and manufactures the following:

- **Ultra-Low Temperature (-60°C) Freezer Containers** – for pharmaceuticals, ice cores, tuna, etc
- **Offshore Refrigerated Containers** – for Hazardous Zones such as oil rigs, oil tankers, and chemical plants
- **Explosion-Proof Refrigerated Containers** – for Petrochemical, Self-Reactive and Like Products
- **Dual Refrigeration System Refrigerated Containers** (with 100% emergency backup capabilities) – for chemicals, pharmaceuticals, and dangerous goods.
- **Tank Refrigeration & Heating Units** – for ISO Containers, Road Trailers and Stationary Applications
- **Military Refrigeration and Air Conditioning Applications** – built to military standards
- **Transport Air Conditioning Units** – built to withstand extreme high temperatures & sandstorms
- **Pre-Coolers** – used for fruit and vegetables in the field allowing for longer shelf life
- **Transport Generator Sets** – built to withstand extreme high temperatures & sandstorms
