## **PRESS RELEASE - KLINGE CORPORATION TO DEMO GSM REMOTE MONITORING FOR THEIR DUAL REDUNDANT REFRIGERATED CONTAINER SYSTEM AT PHARMA EVENT**

September 2016, York, Pennsylvania

Later this month, Klinge Corporation will conduct a demonstration of their Global Monitoring System (GSM) remote monitoring system with optional satellite back-up at the Cold Chain Global Forum. The system is used in particular on their special Dual Redundant Refrigerated Containers which feature two refrigeration units with automatic switchover. Total redundancy prevents temperature deviations of cold chain supplies.

During the demonstration, Klinge Corporation will show how temperature data is recorded and accessed on a password-protected website for each customer. The GSM communicates cargo temperature, location, alarm status and power source.

Alerts are emailed and text messaged to inform the customer. This technology prevents temperature excursions from occurring as any issues are directly communicated to the customer in real-time.

The GSM is utilized with Klinge Corporation's special Dual Redundant Refrigerated Containers and Dual Redundant Freezer Containers. These Container Systems feature two full capacity reefers or freezers with automatic switchover. This redundancy fully safeguards pharmaceuticals. Adding to the reliability of the Refrigerated and Freezer Containers is an optional built-in generator set for back-up power.

Klinge Corporation will demo the GSM on Thursday, September 29 at the Cold Chain GDP & Temperature Management Logistics Global Forum in Boston, Massachusetts. The company is also sponsoring an evening cocktail reception on Wednesday, September 28.

## About Klinge Corporation

Klinge Corporation is the leading provider of specialized transport refrigeration and power generation equipment. Founded as a spin-off of the Transport Refrigeration Equipment department of York International, Klinge has been producing refrigeration equipment at its manufacturing facilities and headquarters in York, Pennsylvania, USA for 29 years.

The company's customized designs offer commercial and military customers robust alternatives to standard, mass-produced refrigerated containers which often cannot meet the requirements of harsh environments or stringent testing.

Klinge Corporation offers Dual Refrigerated Containers, Offshore Explosion-Proof Refrigerated Containers, Refrigerated Tank Containers, Blast Freezers, Ultra-Low Temperature Units, Quick Thaw Units, Integral and External Generator Sets, and Collapsible Food Storage Bins.

The company designs and manufactures the following:

- **Ultra-Low Temperature (-60° C) Freezer Containers** - for pharmaceuticals, ice cores, tuna, etc
- **Offshore Refrigerated Containers** - for Hazardous Zones such as oil rigs, oil tankers, and chemical plants
- **Explosion-Proof Refrigerated Containers** - for Petrochemical, Self-Reactive and Like Products
- **Dual Refrigeration System Refrigerated Containers** (with 100% emergency backup capabilities) - for chemicals, pharmaceuticals, and dangerous goods.
- **Tank Refrigeration & Heating Units** - for ISO Containers, Road Trailers and Stationary Applications
- **Military Refrigeration and Air Conditioning Applications** - built to military standards
- **Transport Air Conditioning Units** - built to withstand extreme high temperatures & sandstorms
- **Pre-Coolers** - used for fruit and vegetables in the field allowing for longer shelf life
- **Transport Generator Sets** - built to withstand extreme high temperatures & sandstorms
